

**AN22G**

## **AIX Network Installation Management: Concepts and Configuration**

16 horas

IBM Cybersecurity

IBM

### **INTRODUÇÃO**

The primary goal of this course is to provide you with a working knowledge of the fundamental capabilities of the Network Installation Management (NIM) facility of the AIX 7.1 operating system. This course uses a combination of instructor lecture and machine exercises to provide you with practical background knowledge of the topics covered.

### **OBJETIVO DO CURSO**

Objectives

- Explain key NIM concepts and terminology
- Display NIM-related information
- Set up a NIM master
- Perform a base AIX (RTE) install
- Define and use several types of NIM objects
- Perform an automated install
- Create and use mksysb resource
- Maintain lpp\_source and SPOT resources
- Update NIM clients

### **PÚBLICO-ALVO**

Audience

This course is appropriate for anyone with system administrative duties installing and managing an AIX operating system in a multiuser POWER (System p) environment.

## PRÉ-REQUISITOS

---

### Prerequisites

Power Systems for AIX I: LPAR Configuration and Planning - (AN11G)

Power Systems for AIX II AIX Implementation and Administration - (AN12G)

You should have:

- Basic knowledge regarding AIX systems administration
- Basic knowledge regarding the use of HMC V7 to manage POWER-based managed systems
- The following course will provided the needed skills for this course:
- Power Systems for AIX I: LPAR Configuration and Planning (AN11G)
- Power Systems for AIX II: AIX Implementation and Administration (AN12G)
